

# Jahanzaib Khan

**Backend Developer | PHP | Node.js | Database Architect**

Karachi, Pakistan | +92 321 3609115 | mjahanzaib5@gmail.com

**Portfolio:** [www.jahanzaib-backend.vercel.app](http://www.jahanzaib-backend.vercel.app)

---

## Professional Summary

Experienced Backend Developer specializing in building robust, scalable APIs and managing complex databases. Proficient in PHP, Node.js, MySQL, MongoDB, and PostgreSQL. I design efficient server-side architectures and ensure high performance for data-driven applications. Partnering with startups and teams to architect scalable systems from concept to deployment.

## Technical Skills

- **Languages & Frameworks:** PHP, Node.js, Express.js, Laravel, JavaScript (ES6+), GraphQL
- **Databases:** MySQL, MongoDB, PostgreSQL, Database Design & Optimization
- **Architecture & DevOps:** RESTful APIs, Server Management, AWS, Docker, CI/CD, Git/GitHub
- **Other:** Performance Optimization, Secure Authentication, Payment Gateway Integration

## Professional Experience

**Backend Lead** | Fascom Limited

Feb 2022 — Dec 2025

- Architecting scalable API solutions using Node.js and Express.
- Developing high-performance server-side logic using Node.js.
- Managing complex database schemas in MongoDB and PostgreSQL.
- Optimizing server performance and ensuring high availability.
- Integrating third-party services and payment gateways to support business operations.

## **Backend Developer | Levnine Digital**

*July 2020 — January 2022*

- Developed custom WordPress plugins and themes using PHP and MySQL.
- Optimized database queries for high-traffic websites to improve load times.
- Developed secure and efficient REST APIs for client-side consumption.
- Led the migration of legacy systems to modern backend architectures.

## **Server-side Developer | ePlanet Communications Inc**

*May 2019 — June 2020*

- Built robust server-side logic and handled complex database interactions.
- Ensured data integrity and implemented security best practices across applications.
- Collaborated with client-side teams to deliver seamless data integration and user experiences.
